

AIR PURIFICATION SOLUTIONS

AIR PURIFIER

DON'T COMPROMISE ON HEALTH AND COMFORT. BREATHE EASY WITH DAIKIN'S AIR PURIFIER.

Turn your home into the great indoors with Daikin's Air Purifier, featuring breathtaking technology, compact portable design and ultra quiet operation.

420 ^{M³/H}
AIR FLOW RATE

46 ^{M²}
ROOMS UP TO

AIR PURIFIER

CLEANER, FRESHER, HEALTHIER AIR

Daikin's Air Purifier includes a 6-layer powerful decomposition and removal system to help eliminate bacteria, mould spores, airborne particles, allergens, dust, pollen and unpleasant odours.

It is also ultra quiet with operating sound levels of as low as 16dBA which means you can not only sleep soundly at night, but also with peace of mind.

INVERTER MOTOR

The inverter efficiently controls fan motor rotational speed for greater power savings.

DUST AND ODOUR INDICATORS

Contaminant and odour levels are displayed on top of the unit allowing for easy monitoring.

HIGH AIRFLOW

Features airflow rate of up to 420m³/h making it suitable for rooms up to 46m².

COMPACT DESIGN

Easy portability and unintrusive design to help optimise in-home space.

ULTRA QUIET

Whisper quiet operations as low as 16dBA ensures a pleasant night's sleep.

6 LAYER FILTRATION SYSTEM

Features a streamer discharge unit, plasma ioniser, three filters and Daikin's trademark titanium apatite deodorising air purification filter.

A Sensitive Smart Choice

Approved by the Asthma and Respiratory Foundation NZ, Daikin air purifiers and split systems are authorised to display the Sensitive Choice butterfly symbol.

OFF TIMER

Set the air purifier to automatically turn off after 1-4 hours usage.

POLLEN MODE

By creating gentle air turbulence, pollen is trapped by the air filter before it settles.

AUTOMATIC OPERATION

Airflow is optimised to suit contamination levels for efficient energy usage.

TURBO MODE

High power operation for quick removal of pollutants.

BRIGHTNESS SETTING

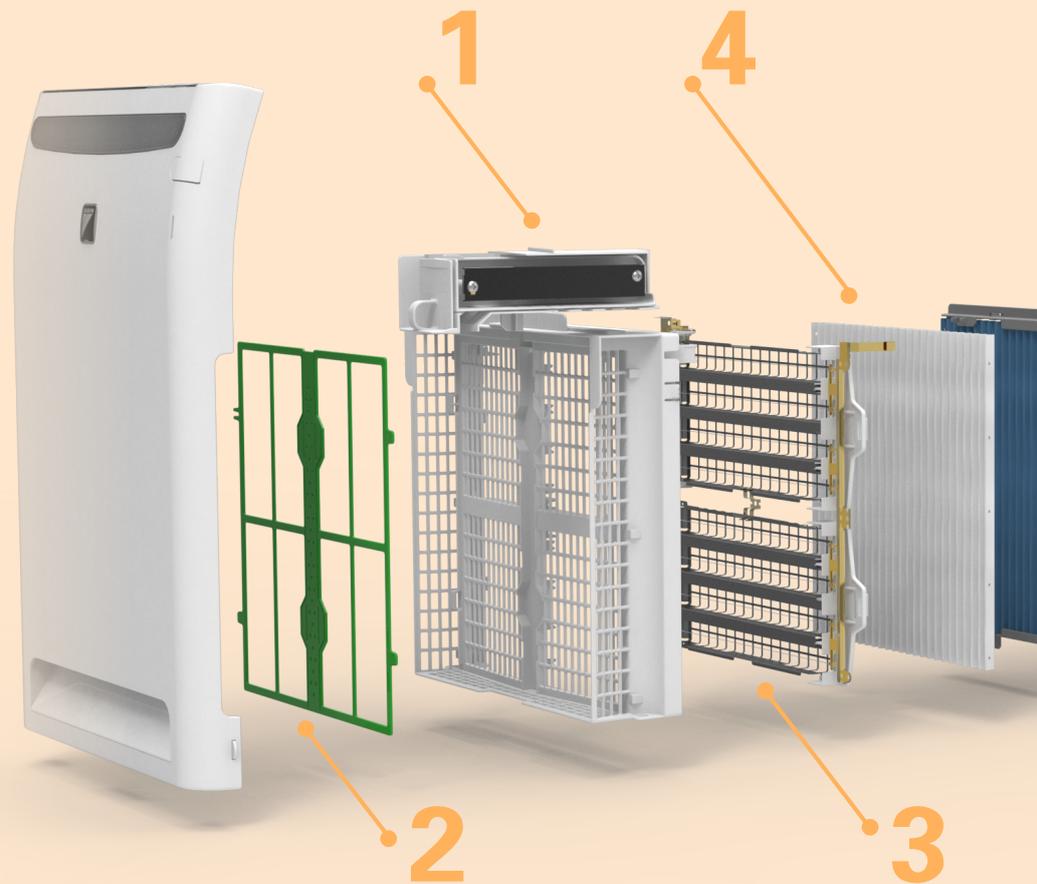

Adjusts the brightness intensity of the dust and odour indicator.

SLEEP MODE

Automatically switches between 'quiet' and 'low' operation mode to suit air contamination levels.

BREATHTAKING TECHNOLOGY

For over 90 years, Daikin has invested heavily in Research and Development to deliver more effective climate control for you and your family. Daikin technologies help make Daikin heat pumps and air purifiers efficient, powerful, reliable and easy to use.

1. STREAMER DISCHARGE UNIT

The streamer discharge unit releases high speed electrons that collide with oxygen and nitrogen molecules, this therefore activates them and enables oxidative bacteria decomposition.

2. PREFILTER

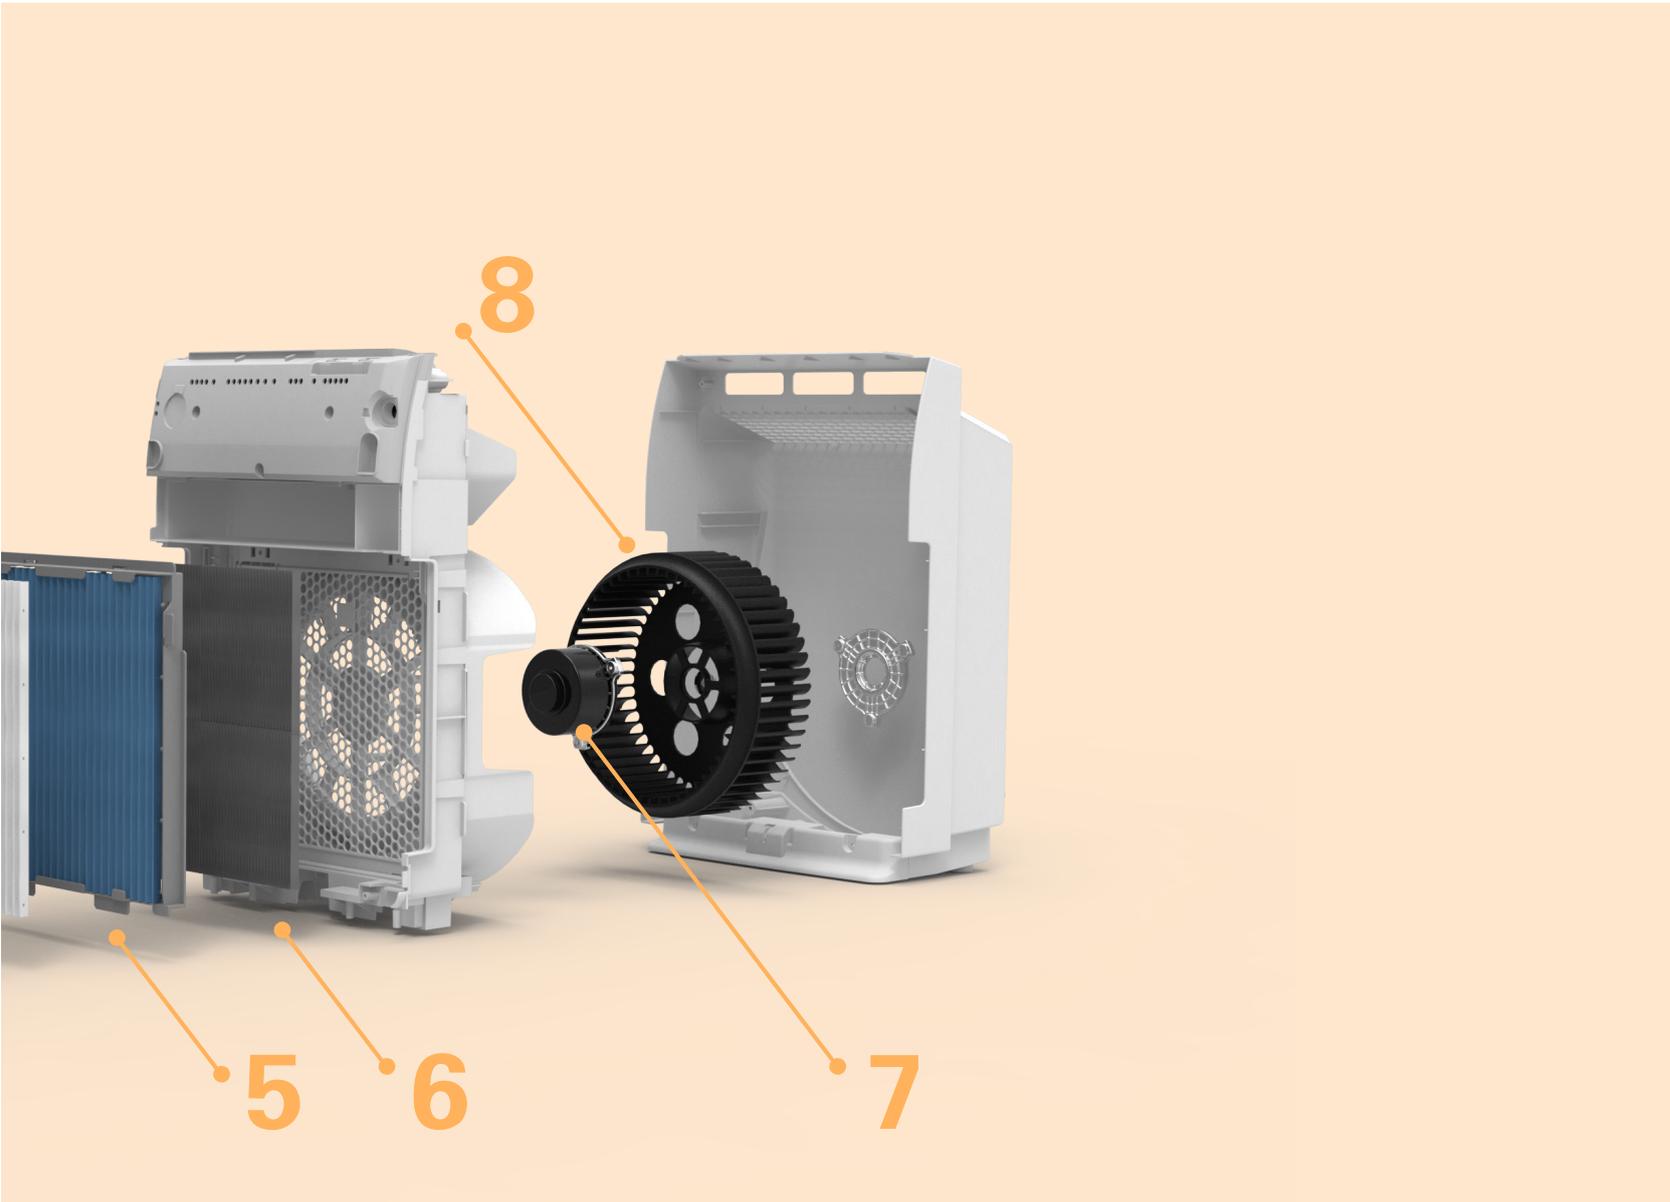

The prefilter is a polypropylene net filter with catechin. It captures larger particulates such as dust, bacteria and allergens to ensure unimpeded operation of other filters in the system.

3. PLASMA IONISER

The plasma ioniser electrically charges any dust and pollens that pass through making it easier for the electrostatic filter to collect.

4. ELECTROSTATIC FILTER

The ionised dust and pollen are attracted to the oppositely charged electrostatic filter. This ensures efficient and thorough collection of these particles by the filter.

5. TITANIUM APATITE DEODORISING FILTER

This specialised filter traps microscopic particles, decomposes odours and even deactivates bacteria via the use of a titanium apatite photocatalyst.

6. DEODORISING CATALYST FILTER

Formaldehyde and any remaining odours are decomposed by the deodorising catalyst filter keeping your air clean, fresh and odour free.

7. INVERTER MOTOR

Daikin's air purifier utilises an inverter that efficiently controls fan motor rotational speed for greater power savings and quiet operations.

8. SIROCCO FAN

Daikin's air purifier is fitted with a light weight sirocco fan. These fans feature an aerodynamic fan blade design which reduces turbulence for a more efficient and quieter air flow delivery.

THE SENSITIVE CHOICE FOR YOUR HOME

We're proud of our innovations. So we're pleased to announce that Daikin Split Air Purifiers are approved by the Asthma and Respiratory Foundation New Zealand. They introduced the Sensitive Choice® program to help identify products better suited for people who suffer from asthma and allergies. Daikin Split Heat Pumps and Air Purifiers are recognised by the Sensitive Choice® program, and carry the Blue Butterfly symbol.

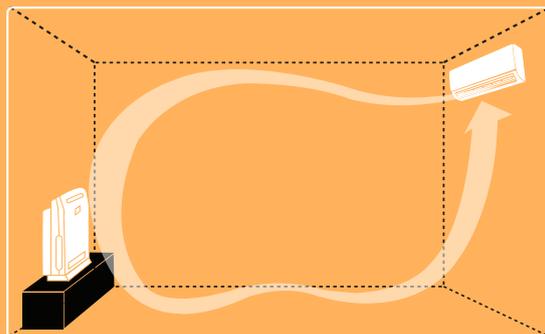

DAIKIN CARES FOR YOUR AIR

All Daikin Split Heat Pumps and Air Purifiers are designed with an air-purifying filter. Many are fitted with a more advanced Titanium Apatite Deodorising Air Purification filter. These filters not only trap most microscopic airborne particles, but also assist to decompose odours, absorb and deactivate bacteria. Music to the ears of every sensitive nose.

SMART INSTALLATION

Here are some ways to determine the optimal placement of your Daikin air purifier.

- To remove house dust, it is effective to install the air purifier at a lower position in the room.
- To remove cigarette smoke it is effective to install the air purifier in a higher part of the room.
- If you install the air purifier opposite the air conditioner, the circulation affect is enhanced. The unit controls unevenness in the room temperature while cleaning the air during heating or cooling operation.

SPECIFICATIONS

MODEL		MC70LPVM				
Power Supply		1 phase, 220-240V, 50Hz				
Colour		White				
Dimensions (HxWxD)	(mm)	576x403x241				
Weight	(kg)	8.5				
Mode		Turbo (HH)	High (H)	Medium (M)	Low (L)	Silent (LL)
Running Current	(A)	0.55	0.25	0.15	0.10	0.08
Rated Power	(W)	65	26	16	10	7
Airflow Rate	(m ³ /h)	420	285	210	130	55
Sound Power Level	(dBA)	63	54	47	39	31
Prefilter		Polypropylene Net with Catechin				
Dust Collecting Method		Plasma ioniser + Electrostatic Dust Collection Filter				
Deodorising Method		Flash Steamer + Titanium Apatite Deodorising Filter + Deodorising Catalyst				
Power Cord	(m)	2				
Standard Accessories		Wireless Remote Controller, Titanium Deodorising Apatite Pleated Filter				

Note:

1. Sound power levels are the average of values measured at 1m way from the front, left, right and top of the unit (this is equal to the value in an anechoic chamber) and may differ once the unit is installed due to ambient conditions

The specifications, designs and information in this brochure are subject to change without notice. Unit colours shown are as close as possible to actual unit colours. Colours depicted in this brochure may vary slightly.

ASSUMPTIONS

All representations made in Daikin marketing and promotional material are based on the assumptions that the correct equipment has been selected, appropriately sized and installed in accordance with Daikin's installation instructions and standard industry practices.

QUALITY CERTIFICATIONS

Daikin Industries Limited was the first air conditioning equipment manufacturer in Japan to receive ISO 9001 certification. All Daikin manufacturing facilities have been certified to ISO 9001 Quality Management System requirements. ISO 9001 is a certificate for quality assurance concerning 'design, development, manufacturing, installation and related service' of products manufactured at that factory.

ENVIRONMENTAL CERTIFICATIONS

Daikin Industries Limited has received ISO 14001 Environmental Certification for the Daikin production facilities listed below. ISO 14001 is an international standard specifying requirement for an environmental management system, enabling an organisation to formulate policy and objectives, taking into account legislative requirements and information about significant environmental impacts. It applies to those environmental aspects within the organisation's control and over which it can be expected to have an influence.

The certification relates only to the environmental management system and does not constitute any endorsement of the products shipped from the facility by the International Organisation for Standardisation.
